

SAPPHIRE

"Harmony" Projection Boards
The perfect partner for the new
generation of
"Interactive Projectors"

Warning
**Never Project onto a
standard whiteboard**

Important Information

If you have a need to project and write onto the screen. This means that you cannot use a standard screen and normal whiteboards would be dangerous due to the "Halo" effect of reflected light as per the above image.

Sapphire have the answer to your problem with our Projection board. Made with the trusted membrane used in Interactive Whiteboards. Giving you the ideal partner for your projector - harmony is restored!

Harmony Projection Boards

Sapphire Av Manufacturing introduce the projection board. Initially we are producing in 1.8m x 1.2m. However we will soon be manufacturing dedicated projection sizes of 16:10 and 4:3.

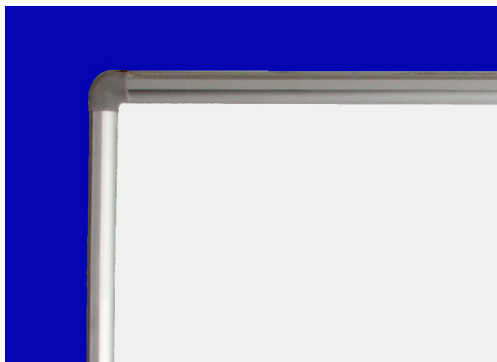

Can I write on my projection board?

Yes you can although it will not clean off as easily as the standard white board as the reason it is safe to project onto is that it has a matt surface.

However it will clean well if you use a good quality cleaner or Fairy Liquid and a damp cloth.

Dimensions of SPB1800

Width of board	1,800 mm
Depth of board	1,200 mm
Viewing area width	1,760 mm
